

PATHFINDER INTERNATIONAL

**Improving Reproductive Health  
through Community-Based Services:  
25 Years of Pathfinder International Experience**

*Pathfinder International believes that reproductive health is a basic human right. When parents can choose the timing of pregnancies and the size of their families, women's lives are improved and children grow up healthier.*

**F**or over 50 years Pathfinder has provided women, men, and adolescents throughout the developing world with access to quality family planning and reproductive health information and services. Pathfinder works to prevent HIV/AIDS, provide care to women suffering from the complications of unsafe abortion, reach adolescents with services tailored to their needs, and advocate for sound reproductive health policies in the U.S. and abroad. Pathfinder collaborates with communities, partner organizations, and government at all levels to strengthen local skills and foster lasting change.

## Community-Based Services

In the late 1970s Pathfinder was one of the first organizations to develop programs supporting the community-based distribution of family planning commodities. Since then, our community-based programs have reached dozens of countries throughout the developing world. Pathfinder works with communities at the grassroots level to expand access and knowledge, stimulate acceptance, and create awareness and ownership of family planning and reproductive health services.

## Table of Contents

<b>Introduction</b>	<b>1</b>
<b>Lesson 1:</b> The support of local leaders and the community as a whole is important for ensuring access and sustainability, and stimulating substantial changes in community behavior. Building the capacity of communities and creating local partnerships is crucial to success.	<b>3</b>
<b>Lesson 2:</b> Integrating HIV information and other health services into community-based distribution programs does not distract from the family planning and reproductive health aspects of the program and can be a cost-effective way to reach a large population with services.	<b>6</b>
<b>Lesson 3:</b> Systematic, effective referral networks, including referrals for long-term family planning, food security, and medical backup, are essential components of community-based services. Community health workers are an essential link between clinics and hard-to-reach areas.	<b>8</b>
<b>Lesson 4:</b> Appropriate compensation for community health workers leads to increased productivity.	<b>10</b>
<b>Lesson 5:</b> Programs must use multiple approaches to bring about behavior change in youth.	<b>12</b>
<b>Lesson 6:</b> Alternative service delivery options help reach vulnerable and hard-to-reach populations, such as adolescents, rural and urban poor, and men.	<b>13</b>
<b>Lesson 7:</b> Community-based service projects must evolve into more cost-effective permanent operations. Use of depot holders, social marketing techniques, and linking with other organizations or programs improves coverage and acceptance.	<b>15</b>
<b>Lesson 8:</b> The financial and professional support of the private sector can be engaged to strengthen community programs and provide sustainability.	<b>16</b>
<b>Lesson 9:</b> Income-generating activities can significantly improve the lives of participants and advance program goals.	<b>17</b>
<b>Conclusion</b>	<b>19</b>
